PROTECTING CHILDREN FROM ONLINE DRUG DEALERS

Tips for Parents

www.learnwithsupp.org

Set Clear Expectations of Privacy

It is normal for kids to become increasingly private as they age. While this is normal, risky aspects of online activity come along. Here are some tips for managing your child's expectation of privacy and ways to monitor their activity.

- Parents should make it clear that they will monitor all online activity, whether with a tablet, smartphone, smart TV, or smart home.
- Take advantage of tools that manage and monitor screen time. The software available for this has come a long way and effectively obscures what kids view online.
- Require of your children to give you their passwords or create their social media profiles with their parents as a level of trust. This is preventing the invisible online.
- Screen social media accounts and look for unusual profiles that may use drug-related or certain terms in their bios.

Learn the Drug Emoji Code

Emojis are used to communicate with friends. The emoji on the right is used by the kid given parents and kids online. If you don't know the code, the more educated parents usually, the better equipped they are to spot illegal activity online.

Understand That Overdoses Are Possible Anytime

When young people are online, they are on the internet, there is a significant risk of a drug overdose. There may be no warning signs for parents or early signs of addiction before an overdose. As it takes a substance used with fentanyl to cause a fatal overdose, parents buying drugs online will not know what is in these substances.

Understand the Dark Web

The dark web is not an internet; it is a hidden part of the internet. It is not easily found like the things you see on the internet. Parents should be aware of the following:

- Devices or computers that have TOR software (The Onion Router), which is the main browser to access the dark web.
- Cryptocurrency is the common payment method.
- Pay attention to what is coming in the mail, such as strange packages or deliveries they are trying to fit.

How are Kids Getting Fentanyl?

Drug dealers use social media to advertise and sell their products. Prescription drugs are the age-old source of supply for drugs using counterfeit, stolen, and other means being sold to make whether using counterfeit drugs, or simply as a counterfeit source from a new source to sell.

The Internet will direct message or comment on the web using dark web or email. Counterfeiters have become sophisticated messaging platforms like Instagram, Facebook, or Telegram. Once the deal is made, payment is made through money, Bitcoin, or cryptocurrency. The packages are shipped via standard post.

The shipping time becomes very short when you realize that the majority of the drug being sold is usually hidden with hidden, hidden, or hidden. The packages are shipped via standard post.

Why Fentanyl is Hard to Avoid

While fentanyl is used by medical professionals, it is also used by drug dealers to mix with other drugs. Unfortunately, many individuals who are trying to use fentanyl end up in a fatal overdose. This is because it is used as an additive to many other drugs. There have been reports of fentanyl found in heroin, cocaine, pills, and even in the glue. There are many fentanyl pills that are passed to look like other legitimate prescription drugs. Individuals who are trying to mix with drugs are becoming more and more at risk.
